

RAT POISON DOESN'T JUST KILL RATS.

It could kill your dog. Poison your kids. And make your rodent problem worse.

■ **10,000+**

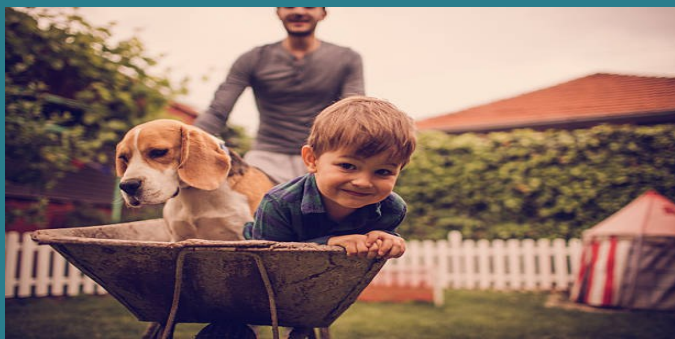

children exposed to rat poison every year in the U.S.
Nearly all under age 6. Hundreds hospitalized annually.

■ POISON DOESN'T STAY IN THE RAT

- **Your dog or cat.** Pets die every year from eating poisoned animals or bait knocked loose in a storm.
- **Your kids.** Children handling tornado debris touch dead animals and bait. Hundreds hospitalized annually.
- **The smell — in your walls.** Poisoned animals crawl off to die in walls and crawl spaces. You'll smell it for weeks.
- **More rats next year.** Kill the hawks, owls, and foxes eating rats for free and rodents multiply after a storm.

■ POISON FREE.

A healthy community starts here.

■ **401,500**

pet poisoning cases annually in the U.S.

Dr. Vanessa Farmer, DVM / WebMD

■ **78%**

of raptors tested showed rodenticide poisoning

WildCare / UC Davis

■ **86%**

of mammals — coyotes, foxes, bobcats, raccoons

WildCare, Marin County CA

■ **67M+**

birds killed by pesticides every year in the U.S.

Chicago Bird Alliance

DON'T EXTERMINATE THE EXTERMINATORS.

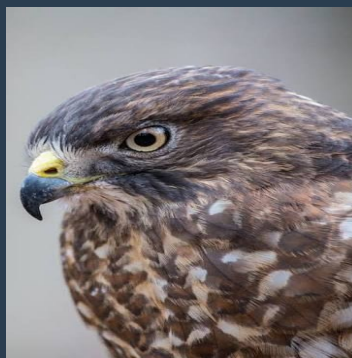

These animals eat rats & mice for free. Rat poison kills them too.
